

Football predictions

Tue 08 Sep 2026 to Thu 10 Sep 2026 | 32 fixtures | generated 08 Sep 2026 17:36

How these were produced. A Dixon-Coles bivariate Poisson model fitted per league on 16,929 matches of results, weighted so recent games count more, blended with a second model fitted on shots on target. Where a closing price exists it is de-vigged and folded in at 90% weight. Every market below is read off one scoreline distribution per fixture, so no two numbers on a row can contradict each other.

What this is not. Over 5,948 walk-forward tests this engine scores a log-loss of 0.9568 against the bookmakers' closing consensus at 0.9558 - it matches the market, it does not beat it. Betting the model's disagreements with the price lost 12.2% of stakes over 3,761 historical bets. Treat these as calibrated estimates of how likely things are, not as tips with an edge.

Primeira Liga (Portugal) | 2

Time	Match	1	X	2	Pick	O2.5	U2.5	BTTS	Score	xG	Confidence
20:45	Moreirense v Benfica	13%	20%	67%	Away	54%	46%	47%	0-2	0.78 - 2.04	Strong

Clubs with no history in their division. Bolton (Championship, rated from League One); West Ham (Championship, rated from Premier League).

Not predicted. Paris SG v Slovan Bratislava (UCL): no rating for Slovan Bratislava - that league is not loaded; Man United v Sabah (UCL): no rating for Sabah - that league is not loaded.

Reading the numbers. 1 / X / 2 are home win, draw and away win. O2.5 and U2.5 are over and under 2.5 total goals. BTTS is both teams to score. Score is the single most likely scoreline, which is often not the same as the most likely result: a favourite's win is spread across many scorelines while draws concentrate on 1-1.
